

Inspired by the timelessness of Rome and by a beauty shaped through permanence, Vena Roma is born as an organic interpretation of classic travertine. A surface where matter appears alive, revealing veins that flow, intersect, and gently dance—like natural marks left by history.

Inspirado en la eternidad de Roma y en la belleza moldeada por la permanencia, Vena Roma nace como una interpretación orgánica del travertino clásico. Una superficie en la que la materia parece viva, revelando vetas que fluyen, se entrecruzan y danzan suavemente, como huellas naturales dejadas por la historia.

Classic tones reinforce the material's timeless character, while the organic nature of the veining brings personality—achieving an exact balance between strength and lightness, tradition and contemporaneity.

Los tonos clásicos refuerzan la atemporalidad del material, mientras que la organicidad de las vetas imprime personalidad: un equilibrio preciso entre fuerza y ligereza, tradición y contemporaneidad.
